 Expand your living space

The perfect outdoor space  
*tailored to your home, garden and budget*

B600

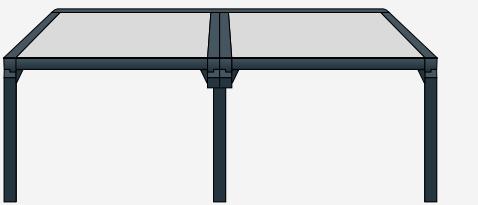

This pergola is  
*open to many things*

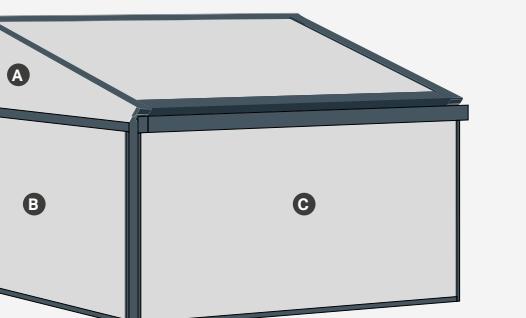

## B128 coupled

### Max dimensions

- Single pole in the middle but always two beams.
- Water drainage from both roofs is possible through the couple pole.
- No LED strip possible in the couple pole.

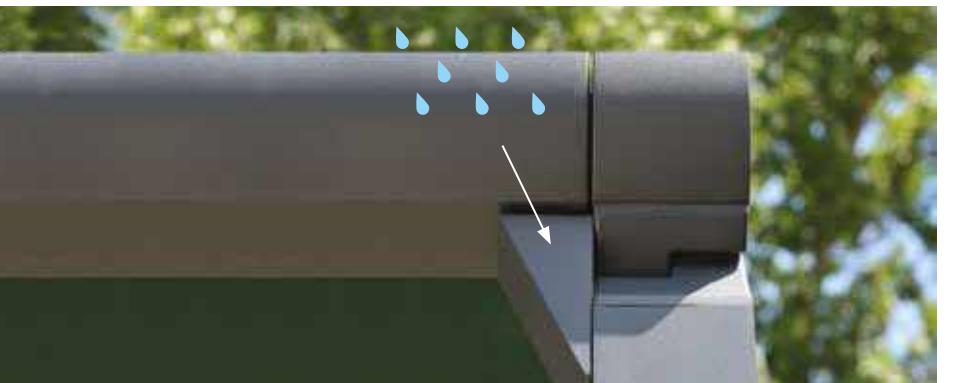

## B128 Screens

- For more privacy, you can close the sides of the B128 entirely with a fixed side canvas.
- ZIP-screen with maximum projection of 4m.
- Other options: B1100/B1350 Solar as screen at the frontside.

Optional adjustable foot

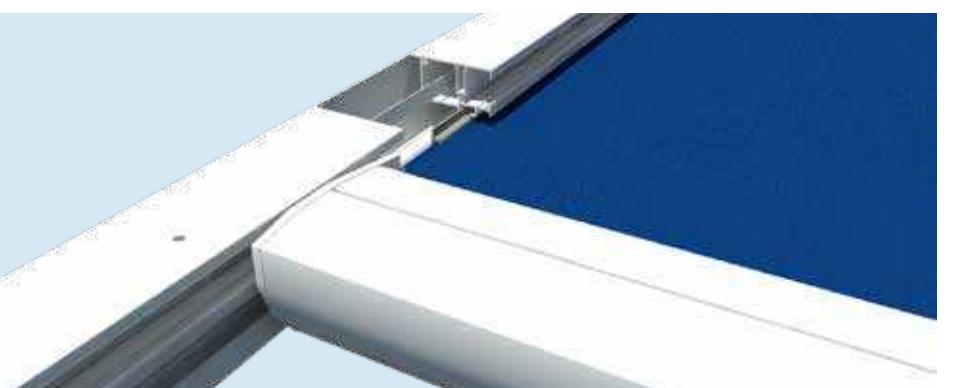

Water drainage through supporting posts

LED lighting options possible in the side guides, the supporting posts or under the support beam

Valance of 1m (Soltis 86/92). The motor runs on a battery which is charged by a small solar panel.

The fabric roof is held tightly into the guides thanks to the continuous tension of the ZIP screen technology

The B128 pergola is a minimalist aluminum terrace cover with a sun and rain resistant roof that uses ZIP-screen technology. The system keeps the canvas tightly stretched with efficient tension mechanisms in the side guides for wind resistance, so without sides flapping up. This smooth surface and the minimal slope of 15cm/m ensures that every drop of rain quickly flows into the invisibly integrated gutter in the front profile.

When closed it offers all the advantages of a real roof, when fully open the B128 pergola disappears and is as good as invisible. The B128 has also a lot of LED lighting options. You can even change the height of the roof thanks to an optional manually operated supporting pole.

**More options and specifications on p. 30**

- Light yet robust frame
- Regulate the perfect amount of light, sun shading and ventilation

### Options

- LED lighting in the side guides, the supporting posts or under the support beam
- Possibility to manually adjust the height on one side
- Water-repellent wall connection
- Wind- / sunsensor

B128

- Aluminum terrace cover with a rain resistant fabric
- Canvas based on ZIP-screen technology
- Overhang possible at 1/3 from the extension to max 1m
- Poles and guides both 8 x 8 cm
- Motorised valance of 1m with RTS motor works on solar panel + battery.

### Max dimensions

6 m x 5 m

5 m x 5 m (with valance)

### Standard colours

RAL 7016 TX

RAL 9016 TX

Wide selection of watertight fabrics.

# B150 B150 XL

With the B150 (XL) pergola you are entering the world of Outdoor Living. The B150 is our basic model and has a lot of functional options. This pergola has also a manually adjustable version which does not have the LED lighting nor any other electrical option.

With the fully automatic B150 and B150XL you have several options to choose from like LED lighting, frame-mounted screens, heating and a rain and snow sensor. You can fully operate this version of the B150 (XL) from a distance with the Somfy remote control or with your smartphone.

**More options and specifications on p 30**

- Basic model with all the advantages of a louvered roof.
- Water draining via pole.
- Stand-alone or lean-to pergola.
- Regulate the perfect amount of light, sun shading and ventilation.

Options

- Water drainage through the vertical posts
- Optional frame-mounted screens
- Possible to couple

- Rotating louvers of 16 cm width.
- **Option** Dimmable RGB or white LED lighting in roof structure.
- **Option** White LED lighting in louvers.

- Rotating louvers of 21 cm width.
- **Option** Dimmable RGB or white LED lighting in louvers and roof structure.

## Max dimensions

6,04 m x 3,5 m (B150)  
5,95 m x 4,5 m (B150 XL)

17,83 m x 3,5 m (B150)  
17,5m x 4,5 m (B150 XL)

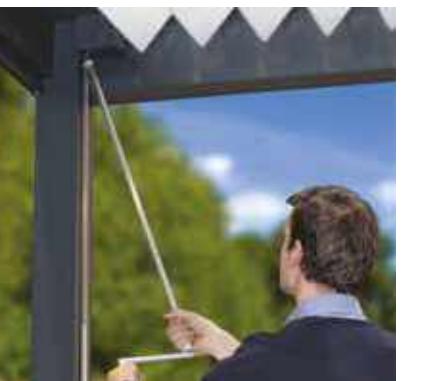

## Standard colours

RAL 7016 TX

RAL 9016 TX

Optional: manual operation

Water drainage through the gutters directly in vertical posts

Optional frame-mounted screens

The integrated ZIP screen is a vertical windproof and insect repellent screen. Thanks to its ingenious zip system, the screen will be kept perfectly in the side guides of the supporting poles.

Optional door profile

Possibility of coupling several modules

Possibility to have overhang up to 2 m and up to max. 1/3 of the surface

Modern design without visible screws

Water drainage through the gutters directly into the supporting posts

## B200 B200 XL

The B200 family suits the most diverse combinations. As shelter, stand-alone, cross- or L-shape. It is certainly the most versatile pergola on today's market. The ideal way to increase your living space!

[More options and specifications on p. 30](#)

Optional LED spots integrated in the frame

Direct (DOWN) and or indirect (UP) LED lighting on the gutters is optional

# B200 B200XL

The B200 (XL) with rotating louvers is definitely our finest outdoor pod from the Brustor Outdoor Living range. Every option, application and lean to possibility makes part of the repertoire of the B200 (XL). This versatility is turning this pergola into the absolute champ of our Brustor range.

Create your own oasis of relaxation as a counterpart for the daily rush. A B200 knows no bounds, only possibilities...

**More options and specifications on p. 30**

- Stand-alone or lean-to module
- Coupled version possible along the width or length
- Custom-made
- Regulate the perfect amount of light, sun shading and ventilation
- Water draining via pole

outdoor living pods

# New B250XL

The B250XL, equipped with 21 cm wide louvers, is the new splash-proof version based on the B200XL. Thanks to the perfect closure of the louvers on the gutters, the roof offers ideal protection against splashes and prevents a cold air flow between the louvers and the gutters. The B250XL with optional ZIP screens and electric heating ensures a pleasant atmosphere all year round.

**More options and specifications on p. 30**

- Design more elegant than ever
- Perfect closure
- No visible screws
- Stand-alone or wall-mounted
- Can be coupled along the length and width
- Water drainage through the pole
- RTS control

#### Options

- io control
- Terrace heating
- Integrated screens
- Additional door pole
- LED louvers
- Spots in the frame
- Speakers

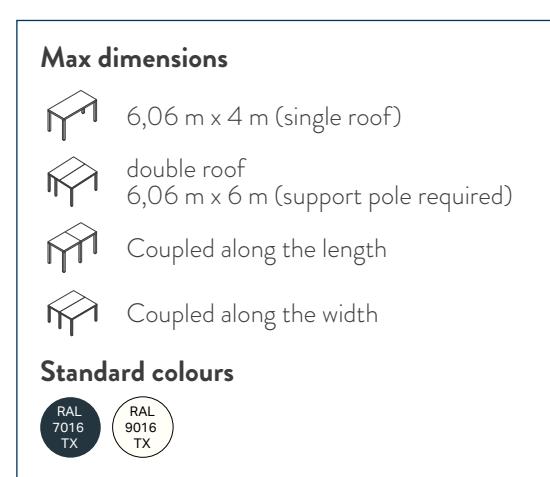

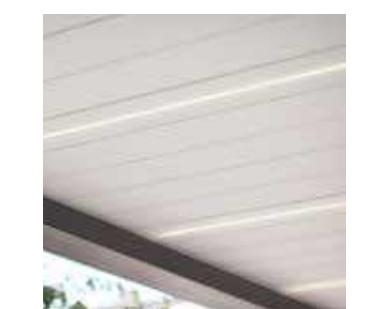

#### B250 XL

- Rotating louvers of 21 cm width
- **Option** Dimmable white LED lighting in louvers

#### Max dimensions

- 6,06 m x 4 m (single roof)
- double roof  
6,06 m x 6 m (support pole required)
- Coupled along the length
- Coupled along the width

#### Standard colours

#### Integrated screens

Integrated screens possible on all sides. You have the choice between a wide range of colours and transparency of the screen fabric.

#### LED-Louvers

The LED strips in the louvers give a beautiful light. Because the lighting is adjustable, it is also possible to create the desired atmosphere ...

#### Spots in the frame

Adjustable LED spots in the frame are possible on all sides.

#### Terrace heating

Powerful heating of 2,000 W (IP65) for cool evenings. You can combine several elements in one module. Available in black, white and anodized.

#### Door pole

An additional door pole is possible to spread your integrated screens over the width and thus retain a door opening. For large versions with a double roof this is sometimes necessary as support.

New

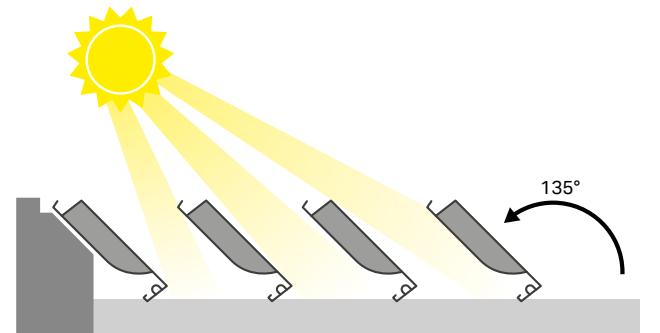

# B250XL

## OPTIMALLY PROTECTED

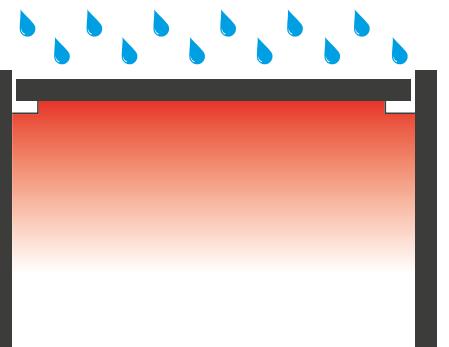

Perfect closure of the louvers on the gutters

Louvers open up to 135°

The warmth is better preserved under the pergola

## B300

Remote control included

The B300 is a highly aesthetical aluminum outdoor living space with a waterproof sliding cover. The fabric can be partially or completely opened for optimal incoming sunlight. Unfolded, it guarantees a perfect sun shading or a shelter against the rain. Thanks to an ingenious roof construction, the water is drained indirectly. The B300 can be fixed on the wall without an extra inclination.

**More options and specifications on p. 30**

- Stand-alone or lean-to module
- Motorised sliding cover
- Coupled version possible along the length
- Regulate the perfect amount of light, sun shading and ventilation

### Options

- LED spots integrated in the frame
- LED lighting on the gutters UP/DOWN in white/RGB
- Integrated ZIP screens

### B300

- Sliding cover

#### Max dimensions

- 7 m x 4 m (single roof)
- 6 m x 6 m (double roof)
- 7 m x 7 m (double roof with 2 extra supporting poles)

#### Standard colours

Wide selection of watertight fabrics.

## B600

The B600 Outdoor Living is the innovative continuation of the proven technology of the B200 family. Its elegant, S-shaped louvers not only allow you to rotate, but also to open to any position. With the roof completely open, the remaining roof surface only takes a mere 13%. Ideal for an optimal light in the mid-season.

The atmosphere lighting options for the B600 create a trendy mood on the undulating louvered roof, while the LED spots on the L-side provide direct and downward light.

For larger surfaces, you can couple several modules of the B600. A small amount of sun, a lot of sun or even a little bit of rain ... The B600 adapts itself as a real convertible!

### More options and specifications on p. 30

- Regulate the perfect amount of light, sun shading and ventilation
- S-shaped louvers for a better water drainage
- When opened the remaining roof surface takes a mere 13%

#### Options

- LED spots on the L-side
- Direct LED lighting on the gutters (DOWN)
- Ledstrip in louvers
- Terrace heater
- Bluetooth speakers

B600

- Rotating and sliding S-shaped louvers.
- **Option** Built-on screens

#### Max dimensions

6 m x 4 m (single module)

#### Standard colours

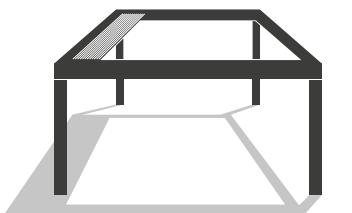

# MAXIMUM SUNLIGHT

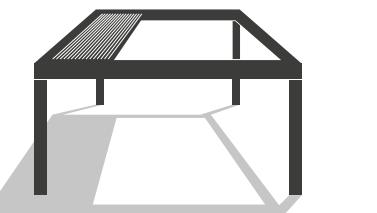

With the B600 you can open the slatted roof almost completely: all S-shaped louvers slide together very compactly, which opens the roof for 87%. The louvers' S-shape lets them join together more compactly but it also ensures an easy water evacuation.

In addition, the S-louver is extra strong and durable due to its typical shape. The louvers rotate up to 135° so you can regulate them optimally, at any time of the day.

When the roof is fully open,  
the louvers only cover **13%**  
of the total surface!

B600 / B600 S Screen 13%

Alternatives on the market 30%

*Super compact*  
louver package

# B600 S SCREEN

The B600 S Screen contains all the well-known assets of the B600, and it boasts some surprising innovations as well. Like the B600, the roof closes very compactly thanks to the retractable louvers. When the roof is open, the louvers cover only 13% of the total surface.

An important innovation is the possibility to choose screens that are perfectly integrated into the frame. The wider and higher gutters ensure a quicker drainage of the rain water and make installation easier since no silicone is required. The terrace roof, LED lighting and screens can be operated via a transmitter or via the Brustor Connect App.

**More options and specifications on p. 30.**

- Compact and retractable louvers
- Integrated screens (in option)
- Advanced gutter system
- The roof opens up to 87%
- RTS control, remote inclusive

Options

- Integrated screens
- LED-spots in frame

# COUPLED PATIO ROOFS ARE EXTREMELY SUITABLE FOR THE RESTAURANT BUSINESS

The Brustor patio roofs are extremely suitable for the food service industry, as the B200(XL) for instance can be mounted in the most various combinations. Single, fixed to the wall, built-in, coupled, in star- or L-shape. That way every large terrace surface can be provided with a customized roof. It is definitely the most versatile patio roof which is on the market today. Guests will certainly appreciate your terrace. Thanks to its many options the pergola can be completely personalized. If there is too much wind, the screens can be closed; if it gets dark, you can use

the atmospheric LED lighting and in colder weather the heater provides a pleasant radiant warmth. These are all details which will enable your guests to dine and enjoy longer, despite the weather conditions. Furthermore, Brustor works exclusively with sustainable materials and sets the bar very high with respect to quality. You will undoubtedly find a solution which meets the needs from both yourself and your customers completely. Investing in a patio roof will therefore be a great added value for your business.

**Rain and/or snow sensor**  
The optional rain sensor detects the first raindrops and automatically closes the roof. A very useful option when you are away from home. When it starts to snow, the sensor automatically opens the louvers completely (up to 90°).

**Patio heater**  
Powerfull 2.000W heater (IP65) for fresher evenings. Multiple patio heaters can be combined for just one module. Available with standard or dimmable receiver to operate with transmitter. The dimmable version can adjust the heater to 100%, 80% or 66% of its total capacity.  
Black, white or anodized finish.

**LED lighting**  
The Brustor Outdoor Living Pods can be equipped with a wide range of lighting possibilities. Indirect or direct, UP or DOWN lighting or even both. Dimmable white or RGB LED strip or LED spots.

For more information about which lighting can be added to which pergola see the overview on page 35.

**Standard colour or RAL**  
The Outdoor Living is available in 2 standard colours: RAL 7016 anthracite grey textured and RAL 9016 textured. It is also possible to order the frame and louvers in a different colour.

More than 200 other worthy RAL colours are available as an option.

RAL 7016 TX

RAL 9016 TX

only frame B200(XL)

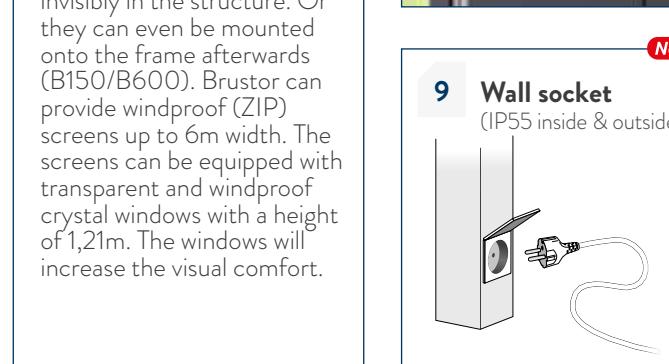

**Coloured glass fibre fabrics**  
The screens and the glass fibre fabrics have an extended collection of colours and designs. Your dealer will be pleased to show you the complete collection. Woven screens are not entirely water- nor lightproof.

# OPTIONS

## CUSTOMIZE YOUR PERGOLA

Do you want more comfort or to personalise your terrace covering? Choose from our wide range of options. For example add some LED lighting for an atmospheric effect or a patio heater which will warm your guests on cooler evenings.

Choose your favourite colour for your outdoor living pod and screens to add the ultimate personal touch. Discover all the possibilities on this page, which we provide immediately at the installation or can also be added easily at a later stage.

B200 XL see p 12

## TECHNICAL ASSETS

### BRUSTOR GUARANTEES A HIGH DEGREE OF FINISHING

Modern design without visible screws

Perfectly integrated screens: almost invisible in the frames

Choice between 2 widths of louvers (16 cm or 21cm)

Patented corner reinforcement in the posts for a solid construction

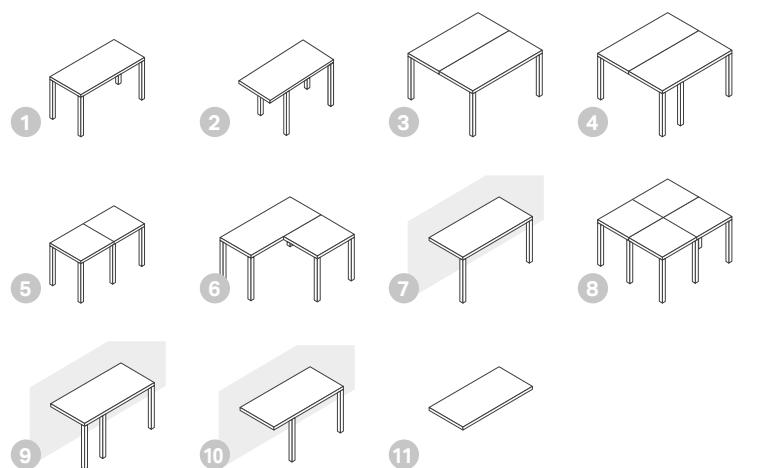

Patented LED strips in louvers

Invisible and adjustable pole support in case of unevenness. Patented

Stand-alone or lean-to module, for every space there is *a tailored solution*

1 Stand-alone version

2 Stand-alone with overhang

3 Coupled roof

4 Coupled roof with door pole

5 Coupled in length or width

6 L-configuration

7 Lean-to version

8 Star configuration

9 Lean-to with door pole

10 Lean-to version with overhang

11 Only roof

#### LEAN-TO POSSIBILITIES (depending on the type)

The Brustor Outdoor Living constructions are perfect to match every installation. The applications depend on the space and use. The aluminum systems can be used as frame only, lean-to module with 2 posts, lean-to module with 4 posts or as stand-alone. Larger roof constructions have 2 roof elements, each with motor. These can be operated together or separately. Bigger areas can be covered by coupling the necessary elements, along the length or width.

#### CUSTOM-MADE

Do you have certain preferences or do you need specific dimensions? Our outdoor living pods can be custom-made according to your specifications. Our craftsmen have the necessary expertise to manufacture them precisely.

#### 5 YEARS OF BRUSTOR WARRANTY

An "Outdoor Living" is a high quality, aluminum, automatic sun shading system with a precise mechanism. This construction is particularly water repellent but complete water tightness is not guaranteed. The construction and the aluminum louvers resist wind speeds up to 120km/h and were CSTB tested. The included warranty certificate contains more technical information and tips to enjoy your BRUSTOR products for many years. BRUSTOR products have a warranty period of 5 years. For a complete overview of the warranty, ask for our specific sales conditions.

Exception: LED lighting and heaters have a 2-year warranty. Electronics has a 3-year warranty. 5 The motor has a 5-year warranty.

# SPECIALISTS IN OUTDOOR LIVING, AWNINGS & SCREENS

## THE SUCCESS OF A FAMILY BUSINESS

Brustor is a family business that has been manufacturing outdoor living pods, awnings and screens for decades. Innovation, quality and a high level are still the key to our success. Together with our many years' experience, we are able to respond to every demand.

## LEADING COMPANY IN EUROPE

Through the years Brustor, a family business, has become a strong player in the international market of sun protection. The in-house production occurs in our new, 50.000m<sup>2</sup> production hall in Gullegem (BE), from where our products are transported worldwide to 30 countries. Even our warehouse continues to grow, so we are able to supply the orders very quickly.

## OUR PEOPLE MAKE THE DIFFERENCE

Our most important capital are our employees. Highly skilled people who always go the extra mile. Whether they are operating machines with greatest precision, accomplishing a commercial role, implementing installations or studying innovating techniques; each and every one of them is an experienced, motivated, customer oriented person with a passion for quality.

## STATE-OF-THE-ART MACHINES

Top quality products demand well-oiled machinery capable of handling the most advanced production and assembly techniques. Operated by highly trained people, our state-of-the-art machines are the acme of precision. High productivity guaranteed. Thanks to a modern powdercoating system, each colour can be realised on our own site.
